### RESEARCH INTERESTS

---

I work in extremal combinatorics and graph theory. My current interests are in spectral extremal graph theory, intersection graphs of paths, intersecting set systems, graph convexity, and majority coloring games. I have also worked on colorings and list colorings of graphs embedded in surfaces, and on the ranks of structured matrices arising from tournaments.

#### *Current Projects*

##### **Majority coloring game on trees**

With Yash Chawda (IIT Jodhpur), Saraswati Girish Nanoti (IISc Bangalore) and Eshwar Srinivasan (Amrita Vishwa Vidyapeetham, Coimbatore). Investigating optimal strategies and computational complexity for the two-player majority coloring game, particularly on binary and ternary trees.

##### **$\triangle$ -convexity in graphs**

With Vishnu Kumar (IIT Jodhpur). Investigating convexity structures in graphs, particularly computing dimensional parameters such as the exchange number and Carathéodory number for  $\triangle$ -convexity, and characterizing the extremal examples.

##### **Brualdi–Hoffman-type extremal problems**

With M. Rajesh Kannan (IIT Hyderabad). Investigating spectral extremal problems for  $F$ -free graphs on  $m$  edges, extending recent results for the case  $F = K_3$  to  $F = K_4$  and beyond.

##### **Intersection graphs of paths**

With Niranjan Balachandran (IIT Bombay), Shagnik Das (National Taiwan University) and Umesh Shankar (IISc Bangalore). Investigating the path-representation number  $\text{prn}(G)$  of a graph  $G$ : bounds in terms of other graph parameters, algorithms for computing optimal path representations, computational complexity of the parameter for different graph classes.

##### **Fractional intersecting families**

Continuing investigation of the Balachandran–Mathew–Mishra conjecture on the maximum size of fractional  $\theta$ -intersecting families over  $[n]$ , building on [Balachandran–Das–Sankarnarayanan \(2025\)](#) and [Balachandran–Bhattacharya–Kher–Mathew–Sankarnarayanan \(2023\)](#).

### EDUCATION

---

#### **PhD (Mathematics)**

2018 – 2024

Indian Institute of Technology (IIT) Bombay

Thesis: “Some problems in combinatorics: Excursions in graph colorings and extremal set theory”

Advisor: Niranjan Balachandran

CPI: 8.89/10.0

#### **BS–MS (Dual) Degree (Major in Mathematics)**

2012 – 2017

Indian Institute of Science Education and Research (IISER) Bhopal

Thesis: “Automorphic forms and Tate’s thesis”

Advisor: Karam Deo Shankhadhar

CPI: 9.31/10.0

### EMPLOYMENT

---

#### **Assistant Professor (Grade II)**

09/2025 – present

Department of Mathematics, IIT Jodhpur

#### **Research Associate**

05/2025 – 09/2025

Department of Mathematics, IIT Hyderabad

Project: “Spectral Theory of Signed Graphs”

Principal Investigator: M. Rajesh Kannan

**Institute Post-Doctoral Fellow**

Department of Mathematics, IIT Bombay

Mentor: Niranjan Balachandran

08/2024 – 02/2025

**Project Assistant**

Department of Mathematics, IISER Bhopal

Project: “Self-dual representations and signs”

Principal Investigator: Kumar Balasubramanian

09/2017 – 11/2017

## RESEARCH GRANTS

---

### Research Initiation Grant (RIG)

2026 – 2027

IIT Jodhpur

Amount: Rs. 4,00,000

Role: Principal Investigator

## TALKS

---

### *Technical*

**Teaching logical statements at the undergraduate level: Why one common definition gets in the way** 2026

Conference on the Practice of Teaching Undergraduate Mathematics, Krea University, Sri City

**Intersection Graphs and Path Representations** 2026

15th Prof. E. Sampathkumar Memorial Endowment Lecture, 22nd Annual Conference of the ADMA & International Conference on Discrete Mathematics, IIT Madras

**Tight bounds on the Carathéodory and exchange numbers for  $\triangle$ -convexity spaces** 2026

Annual Meru Combinatorics Conference, IIT Bhilai

**Competency-based Learning in Mathematics** 2026

Session at the STEM Teacher Training Program, organized (in association with Jodhpur Zila Parishad and Shiksha Vibhag) by the Centre for Education Technology, IIT Jodhpur

**Nonstandard analysis: a gentle introduction** 2025

Discussion Meeting on Number Theory and Combinatorics, Evolve Back, Coorg

**Bisection-closed families, tournaments, and symmetric designs** 2025

Geometry, Probability, and Algorithms, International Centre for Theoretical Sciences, Bengaluru

**Sunflowers and symmetric designs** 2025

Research Seminar, Department of Mathematics, IIT Jodhpur

**Sunflowers and symmetric designs** 2024

Research Associate Seminar, Theoretical Statistics and Mathematics Unit, Indian Statistical Institute, Bangalore Centre

**Some recent work on fractional intersecting families** 2024

Annual Meru Combinatorics Conference, Graphic Era Hill University, Bhimtal Campus

**Sunflowers, tournaments, and symmetric designs** 2024

Institute Post-Doctoral Fellowship Seminar, Department of Mathematics, IIT Bombay

**Some recent work on fractional intersecting families** 2024

CSE Research Symposium, IIT Palakkad

### *Popular and Expository*

**What Is Combinatorial Thinking?** 2026

Summer School for Women in Mathematics and Statistics, ICTS Bengaluru

**A Combinatorial Gem of Maryam Mirzakhani: List Colorings of Planar Graphs** 2026

One Day Symposium Celebrating Women in Mathematics, IIT Jodhpur

**Counting the Infinite** 2025

National Mathematics Day Guest Lecture, Government College Makroniya Bujurg, Sagar, Madhya Pradesh (online)

**A Glimpse of Infinity** 2020

National Mathematics Day Webinar, Raja Bhoj Govt. College Katangi, Balaghat, Madhya Pradesh (online)

## EVENTS ORGANIZED

---

**Research discussion group: Extremal problems on fractional intersecting families** 2026

Conference on Frontiers in Combinatorics – Topology, Algebra and Data-Driven Insights, BITS Pilani, Pilani Campus

|                                                                                                                                                                 |      |
